M. C. Engine Jumps Track; Fireman Injured

SPREADING RAILS CAUSES WRECK AT FRANKFORT

A speeding Michigan Central switch engine jumped the track, and plowed thru the ties for a hundred feet, a mile east of Frankfort, at 6 o'clock Monday morning.

As the engine left the track, Gilbert Meyers, 21 years, of 1107 Cass street, Joliet, the fireman, jumped from the cab and suffered a fractured left leg when he struck the gravel ballast of the roadbed. Andrew Gillespie, the engineer, stayed with the engine, which remained upright on the ties. He was not injured.

The engine was going east light. Spreading rails are said to have caused the accident.

Meyers was removed to St. Joseph's hospital, Joliet, where it was said he was not seriously injured.

Mokena Man Falls on Muddy Walk; Injured

An excavation was made Saturday for installing the village water at the former Frick place, now occupied by Rev. Roesner, and the earth placed on the sidewalk. After the excavation was filled up, some of the clay was left on the walk. The clay had become wet, and late in the evening, as Fred Steinhagen, Sr., was coming from his son Louis' home, he stepped on the wet clay, slid and fell. John Mattes witnessed the accident, and picked him up. Dr. G. A. Kerr was summoned, and found Mr. Steinhagen had broken two ribs in the fall.

Frankfort Boy Wins Coveted School Honor

Word has come from Northwestern University announcing an honor conferred upon Herbert P. Folkers of Frankfort, well known in this district. Each year at Northwestern nine students of the law school are appointed monitors. Each monitor receives \$150 compensation and spends a few hours weekly working in the library and study halls. The appointments are made upon the basis of scholastic standing.

Do you know we are equipped

to safeguard your valuable papers—Bonds, Notes, Insurance and Pension papers, as well as jewelry, silverware and other treasured articles?

When we say "Big Protection for Little Money" we mean a box in our Safe Deposit Vault which rents by the year as low as \$3.00

Even a person who has only a few valuable papers needs this protection. We'll gladly explain this service if you will give us an opportunity.

OPLAND STATE BANK
ORLAND, ILLINOIS

New \$4300 Lutheran School Voted For Orland

At a meeting of the congregation members of the Christ Lutheran Church of Orland, held on Sunday, it was voted to build a new Lutheran school house at a cost of \$4,300. A vote taken on the proposition stood 20-4 in favor of the new building. The first and second payments on pledges are to be mailed to C. F. Habenicht. Four new members were added to the church fold, namely: John A. Rauch, Emil Bettenhausen, Harry Keuch and Geo. Uthe.

Tinley Park Will Have Concrete Road

Tinley Park is now fully realizing that it is going to have a real concrete highway to run thru its principal street, the Bachelor Grove road. The State highway forces are busily engaged putting in concrete bridges and culverts ahead of the concrete laying forces. A bridge gang is now at work putting in a concrete bridge of the drainage ditch in the north end of town. The Bachelor Grove road is now closed against traffic. The concrete laying force is now located at Midlothian, where the first concrete has been poured. After the road has been built thru Gosselville, work will be started this way, and the concrete highway will be built thru Tinley Park by fall.

A cow-testing association has been formed recently in the southern part of Cook county. The official tester started work Monday. Many of the farmers of Bremen township are members of the new association.

Light Frost Seen 4th of July Morning

August Hentsch of Mokena is authority for the statement that a light frost visited this section Fourth of July morning. He said he was up before sunrise, and discovered that some of the garden stuff in his garden had been nipped by the frost.

Frankfort May Get Gasoline Car Service On M. C. By July 15

Rumor has it that Frankfort will soon see the first tryout of the gasoline cars on the Michigan Central by July 15th. It is said these cars will be run from Gary, and a two-hour schedule will be maintained. These will mean a big improvement in Frankfort's transportation service. The local agent has not been notified as yet of the proposed operation of these cars.

No trace has been found of the two hold-up men who recently held up Miss Grace Kohlhaugen and a friend while they were returning from a dance at the Borman grove. The robbers stepped in front of the auto and stopped them; then pulled their guns on them. Miss Kohlhaugen's friend was robbed of a gold watch and some money. Miss Kohlhaugen was wearing a diamond ring, and when she saw what was happening, she quickly slipped the ring in her mouth, and thus saved it.

A Ford sedan, west bound, ran off the Lincoln highway west of the street car curve at the end of the concrete road into a ditch, Wednesday afternoon. A young lady suffered a fractured nose. The couple were from Utica. A bus coming along at the time stopped, and the driver and Wm. Green, the latter of Frankfort, assisted in getting the car back on the highway again.

The Community Cinema, which has been showing at Frankfort hall the past week, has been a rousing success. The pictures shown were clear and interesting. Full houses were played to right along.

Arthur C. Bauch, who recently purchased the former Joliet and Eastern car barns, expects to move his garage into this car barn within the next thirty days. He will have the largest garage in town. He also will store cars next winter, as he has steam heat and plenty of room in his new garage.

Mrs. Hanson, residing north of town, has opened her boarding house again.

It is understood that the mulcase of Devi Doty, which caused so much comment last summer, is scheduled to come up in the County Court in September.

Miss Irma Schroeder is clerking at the R. E. Stephens store, taking the place of Miss Mabel Haake, who was recently married.

Clarence Folkers has gone to Camp Knox, Ky., to take a five weeks' training course with the R. O. T. C.

George H. Green of Chicago has been spending a few days with his mother, Mrs. J. L. Green.

Rev. Theo. Miner of the Frankfort M. E. church came home ill Friday, and has been confined to his bed for several days. No church services were held Sunday on account of his illness.

F. L. Randall of Kansas City, Mo., father of William Greene, has been spending ten days at the Greene home. Mr. Randall is a writer, and many of his articles and stories have appeared in some of the best magazines in the country. Two of his stories, "Rolling Stone" and "The Mad Poet of Moscow," appeared in The Black Cat magazine.

The colored man who is running a refreshment stand on the Lincoln highway at the four corners, north of town, sold 1000 ice cream cones in one day last week. He is doing a land office business.

A Chipped Frame.

If a corner is chipped off of a gilt-edge frame camouflage it with chewing gum. Gild with gold paint.

Mokena Insurance Agents Pay Special Tax on Premiums

All the fire insurance agents in Mokena are paying their annual tax on all premiums they have written thruout the year to the village of Mokena this month. These taxes go toward the upkeep of the volunteer fire department.

Mr. and Mrs. Hall have been entertaining the latter's sister and husband from Michigan, who have just completed an auto tour of Washington and the Eastern States. They also visited at the Lockwood home in New Lenox.

Eight auto loads of Mokenaites went to Cedar Lake for an outing Sunday. Among the party were the Philip and George Hacker families, the Barnes family, and Frank Vally family.

Mr. and Mrs. Howard Gorham of Lockport spent Sunday at the James Cooper home.

Fred Shubert and family of Homer spent the Fourth with the former's cousin, A. E. Wachter. Elmer Cooper attended a gathering of the AA-Zas Temple of the K. P.'s at Racine, Wis., the latter part of the week.

Mokena had one Fourth of July accident case. Adam Miller suffered a quite badly burned nose when sparks from a fireworks known as "son-of-a-guns" flew up in his face.

The Fourth of July passed over quietly in Mokena. The Mokena Men's Club held a dance at their pavilion in the afternoon and evening. There were all kinds of games, races and sports in the afternoon.

Mr. and Mrs. Robert Bechstein of Chicago are spending the summer at their summer home here. They entertained friends from Chicago over the Fourth.

Mr. and Mrs. Walter Fisher entertained a large company of relatives of Joliet over the 4th.

George Koeller underwent an operation for appendicitis at the Silver Cross hospital, Joliet, Thursday. He is improving nicely.

The Mokena Home Improvement Club met at New Lenox with Mrs. D. H. Lockwood last Thursday. There was a good attendance and all enjoyed a good time.

The Home Improvement Clubs of Will county will hold their annual picnic at Cherry Hill on July 18th. A large number of the members of the Mokena Home Improvement Club expect to attend.

The Immanuel Lutheran church of Mokena will hold their Fourth Annual Picnic at the Men's Club pavilion on Sunday, July 9th, afternoon and evening. There will be games, races, swing-bowling, etc. A supper will be served at a reasonable price. The Riverdale band of 20 pieces, from Chicago, will furnish the music.

LUTH. IMMANUEL CHURCH

W. J. KEMNITZ, PASTOR

The 50th anniversary of the Synodical Conference will be observed Sunday, July 9th, at 10 a. m. The services will be in the German language, and a special offering will be taken for the church building fund of the Negro mission.

In the afternoon and evening of July 9th our annual picnic will be held. We are trying to make it bigger and better than ever. Come out to Cappel's grove and enjoy yourself. The Riverdale band, some twenty pieces, will entertain you with choice music.

Necessity for Saving.

Any man who cannot save money is bound to be dependent on relatives or charity when he attains old age and is unable to earn a salary.

Child Plunged Into Cistern When The Platform Breaks

Helen, nine year old daughter of Dr. and Mrs. Van Wormer, of Tinley Park, had a narrow escape from drowning, when she fell in a cistern, while playing at the Henry Wymann place, Saturday evening. She happened to run on top of an old cistern, and the boards gave way, precipitating her into five feet of water. Mr. Wymann heard her scream, and immediately jumped into the cistern, which is 10 feet deep, and rescued the child as she arose to the surface of the water, having gone under once. She was quickly resuscitated, and is none the worse for her frightful experience.

BRIGHT LIGHT FIEND CAUSES AUTO WRECK

James Cannon and Charles Dawson of Orland figured in a serious auto accident a week ago Saturday, while taking out a new Ford for demonstrating purposes. The accident happened on Keene avenue, about 10 o'clock at night. They met a Buick coming with glaring lights, and Mr. Cannon being blinded by the glaring lights, crashed into the Buick. The Ford was wrecked, and Mr. Dawson was thrown out on his head, suffering a fractured skull and many other bruises. He was taken to the Burnside hospital, where he has been in a critical condition since.

TINLEY PARK

A large company of neighbors and relatives gathered at the home of Mrs. Kate Hopman Sunday to celebrate her birthday. The afternoon and evening was spent in playing Bunco as the chief diversion and other games. In the evening a sumptuous supper was served. The prize winners were: High score, Mrs. Wm. Mancke; low score, Mrs. George Theis.

The Tinley Park A. C. ball team will hold a dance at the Linden garden on Saturday, July 15th. Sweet's orchestra of Joliet will furnish the music.

The Fourth was a big day for Tinley Park. A big crowd attended the celebration held at Linden garden, afternoon and evening.

Mr. and Mrs. Carl Brown of Chicago visited at the home of Mrs. Schlatter, Sunday.

Mr. and Mrs. Edward Mohr entertained a large company of relatives Sunday.

Mrs. C. Andres of Chicago spent the week end and the Fourth with Tinley Park relatives.

The Luther League met Thursday night at the German school in monthly session.

Mrs. John Bettenhausen, who has been quite ill for some time, is quite low.

The M. E. Sunday school of Tinley Park held a picnic on the lawn at the Henry Wymann home, Thursday. The porch was prettily draped with flags and bunting, and at night the lawn was lighted with electric lights. A big supper was served, and a program carried out in the evening. All had a good time.

FOR SALE—One Thornhill Wagon, in good condition; also one mare and colt by side.

W. JORGENSEN,
Tinley Park.

FURNITURE FOR SALE

I have a number of articles which I will sell at a bargain. Furniture is stored at the Fisher store in Mokena. Will be at this store all day Tuesday, July 11th, to sell same.

MRS. SADIE F. GROGAN.

The Safest and Simplest

and most systematic way to pay bills is by check. No one disputes the endorsement on the back of your check. You have a receipt for every dollar you spend.

MARY MARIE

BY ELEANOR H. PORTER

ILLUSTRATIONS BY R.H. LIVINGSTONE.

COPYRIGHT BY ELEANOR H. PORTER.

MARY—AND MARIE

SYNOPSIS.—In a preface Mary Marie explains her apparent "double personality" and just why she is a "cross-current and a contradiction." Mary Marie says: "Father calls me Mary. Mother calls me Marie. Everybody else calls me Mary Marie. The rest of my name is Anderson. "I'm thirteen years old, and I'm a cross-current and a contradiction. That is, Sarah says I'm that. (Sarah is my old nurse.) She says she read it once—that the children of unlikes were always a cross-current and a contradiction. And my father and mother are unlikes, and I'm the children. That is, I'm the child. I'm all there is. And now I'm going to be a bigger cross-current and contradiction than ever, for I'm going to live half the time with Mother and the other half with Father. Mother will go to Boston to live, and Father will stay here—a divorce, you know." She also tells why she is going to keep a diary. She begins with Nurse Sarah's story of her birth.

CHAPTER I.—Continued.

Of course, when you stop to think of it, it's sort of queer and funny, though naturally I didn't think of it, growing up with it as I did, and always having it, until suddenly one day it occurred to me that none of the other girls had two names, one for their father and one for their mother to call them by. I began to notice other things then, too. Their fathers and mothers didn't live in rooms at opposite ends of the house, their fathers and mothers seemed to like each other, and to talk together, and to have little jokes and laughs together, and twinkle with their eyes. That is, most of them did.

And if one wanted to go to walk, or to a party, or to play some game, the other didn't always look tired and bored, and say, "Oh, very well, if you like." And then both not to do it, whatever it was. That is, I never saw the other girls' fathers and mothers do that way; and I've seen quite a lot of them, too, for I've been at the other girls' houses a lot for a long time. You see I don't stay at home much, only when I have to. We don't have a round table with a red cloth and a lamp on it, and children round it playing games and doing things, and fathers and mothers reading and mending. And it's lots jollier where they do have them.

Nurse says my father and mother ought never to have been married. That's what I heard her tell our Bridget one day. So the first chance I got I asked her why, and what she meant.

"Oh, la! Did you hear that?" she demanded, with the quick look over her shoulder that she always gives when she's talking about Father and Mother. "Well, little pitchers do have big ears, sure enough!"

"Little pitchers," indeed! As if I didn't know what that meant! I'm no child to be kept in the dark concerning things I ought to know. And I told her so, sweetly and pleasantly, but with firmness and dignity. I made her tell me what she meant, and I made her tell me a lot of other things about them, too. You see, I'd just decided to write the book, so I wanted to know everything she could tell me. I didn't tell her about the book, of course. I know too much to tell secrets to Nurse Sarah! But I showed my excitement and interest plainly; and when she saw how glad I was to hear everything she could tell, she talked a lot, and really seemed to enjoy it, too.

You see, she was here when Mother first came as a bride, so she knows everything. She was Father's nurse when he was a little boy; then she stayed to take care of Father's mother, Grandma Anderson, who was an invalid for a great many years and who didn't die till just after I was born. Then she took care of me. So she's always been in the family ever since she was a young girl. She's awfully old now—most sixty.

First I found out how they happened to marry—Father and Mother, I'm talking about now—only Nurse says she can't see yet how they did happen to marry, just the same, they're so totally different.

But this is the story.

Father went to Boston to attend a big meeting of astronomers from all over the world, and they had banquets and receptions where beautiful ladies went in their pretty evening dresses, and my mother was one of them. (Her father was one of the astronomers, Nurse said.) The meetings lasted four days, and Nurse said she guessed my father saw a lot of my mother during that time. "Anyhow, he was invited to their home, and he stayed another four days after the meetings were over. The next thing they knew here at the house, Grandma Anderson had a telegram that he was going to be married

to Miss Madge Desmond, and would they please send him some things he wanted, and he was going on a wedding trip and would bring his bride home in about a month.

It was just as sudden as that. And surprising!—Nurse says a thunderclap out of a clear blue sky couldn't have astonished them more. Father was almost thirty years old at that time, and he'd never cared a thing for girls nor paid them the least little bit of attention. So they supposed, of course, that he was a hopeless old bachelor and wouldn't ever marry. He was bound up in his stars, even then, and was already beginning to be famous, because of a comet he'd discovered. He was a professor in our college here, where his father had been president. His father had just died a few months before, and Nurse said maybe that was one reason why Father got caught in the matrimonial net like that. (Those are her words, not mine. The idea of calling my mother a net! But nurse never did appreciate Mother.) But Father just worshiped his father, and they were always together—Grandma being sick so much; and so when he died my father was nearly beside himself, and that's one reason they were so anxious he should go to that meeting in Boston. They thought it might take his mind off himself, Nurse said. But they never thought of its putting his mind on a wife!

So far as his doing it right up quick like that was concerned, Nurse said that wasn't so surprising. For all the way up, if Father wanted anything he insisted on having it, and having it

A Little Slim Eighteen-Year-Old Girl With Yellow, Curly Hair.

right away then. He never wanted to wait a minute he found a girl he wanted, he wanted her right away then, without waiting a minute. He'd never happened to notice a girl he wanted before, you see. But he'd found one now all right; and Nurse said there was nothing to do but to make the best of it and get ready for her.

There wasn't anybody to go to the wedding. Grandma Anderson was sick, so of course she couldn't go, and Grandma was dead, so of course he couldn't go, and there weren't any brothers or sisters, only Aunt Jane in St. Paul, and she was so mad she wouldn't come on. So there was no chance of seeing the bride till Father brought her home.

Nurse said they wondered and wondered what kind of a woman it could be that had captured him. (I told her I wished she wouldn't speak of my mother as if she was some kind of a hunter out after game; but she only chuckled and said that's about what it amounted to in some cases.) The very idea!

The whole town was excited over the affair, and Nurse Sarah heard a lot of their talk. Some thought she was an astronomer like him. Some thought she was very rich, and maybe famous. Everybody declared she must know a lot, anyway, and be wonderfully wise and intellectual; and they said she was probably tall and wore glasses, and would be thirty years old, at least. But nobody guessed anywhere near what she really was.

Nurse Sarah said she should never forget the night she came, and how she looked, and how utterly flabbergasted everybody was to see her—little slim eighteen-year-old girl with yellow, curly hair and the merriest laughing eyes they had ever seen. (Don't I know? Don't I just love

Mother's eyes when they sparkle and twinkle when we're off together sometimes in the woods?) And Nurse said Mother was so excited the day she came, and went laughing and dancing all over the house, exclaiming over everything. (I can't imagine that so well. Mother moves so quietly now, everywhere, and is so tired, 'most all the time.) But she wasn't tired then, Nurse says—not a mite.

"But how did Father act?" I demanded. "Wasn't he displeased and scandalized and shocked, and everything?"

Nurse shrugged her shoulders and raised her eyebrows—the way she does when she feels particularly superior. Then she said:

"Do? What does any old fool—begin? Your pardon an' no offense meant, Miss Mary Marie—but what does any man do what's got bejuggled with a pretty face, an' his senses completely took away from him by a chit of a girl? Well, that's what he did. He acted as if he was bewitched. He followed her around the house like a dog—when he wasn't leadin' her to something new; an' he never took his eyes off her face except to look at us, as much as to say: 'Now ain't she the adorable creature?'"

"My father did that?" I gasped. And, really, you know, I just couldn't believe my ears. And you wouldn't, either, if you knew Father. "Why, I never saw him act like that!"

"No, I guess you didn't," laughed Nurse Sarah with a shrug. "And neither did anybody else—for long."

"But how long did it last?" I asked.

"Oh, a month, or maybe six weeks," shrugged Nurse Sarah. "Then it came September and college began, and your father had to go back to his teaching. Things began to change then."

"Right then, so you could see them?" I wanted to know.

Nurse Sarah shrugged her shoulders again.

"Oh, la! child, what a little question-box you are, an' no mistake," she sighed. But she didn't look mad—not like the way she does when I ask why she can take her teeth out and most of her hair off and I can't; and things like that. (As if I didn't know! What does she take me for—a child?) She didn't even look displeased—Nurse Sarah loves to talk. (As if I didn't know that, too!) She just threw that quick look of hers over her shoulder and settled back contentedly in her chair. I knew then I should get the whole story. And I did. And I'm going to tell it here in her own words, just as well as I can remember it—bad grammar and all. So please remember that I am not making all those mistakes. It's Nurse Sarah.

I guess, though, that I'd better put it into a new chapter. This one is yards long already. How do they tell when to begin and end chapters? I'm thinking it's going to be some job, writing this book—diary, I mean. But I shall love it, I know. And this is a real story—not like those made-up things I've always written for the girls at school.

CHAPTER II

Nurse Sarah's Story.

And this is Nurse Sarah's story. As I said, I'm going to tell it straight through as near as I can in her own words. And I can remember most of it, I think, for I paid very close attention.

"Well, yes, Miss Mary Marie, things did begin to change right there an' then, an' so you could notice it. We saw it, though maybe your pa an' ma didn't at the first."

"You see, the first month after she came, it was vacation time, an' he could give her all the time she wanted. An' she wanted it all. An' she took it. An' he was just as glad to give it as she was to take it. An' so from mornin' till night they was together, trappin' all over the house an' garden, an' trampin' off through the woods and up on the mountain every other day with their lunch."

"You see she was city-bred, an' not used to woods an' flowers growin' wild; an' she went crazy over them. He showed her the stars, too, through his telescope; but she hadn't a mite of use for them, an' let him see it good an' plain. She told him—I heard her with my own ears—that his eyes, when they laughed, was all the stars she wanted; an' that she'd had stars all her life for breakfast an' luncheon an' dinner, anyway, an' all the time between; an' she'd rather have something else, now—somethin' alive, that she could love an' live with an' touch an' play with, like she could the flowers an' rocks an' grass an' trees."

"Angry? Your pa? Not much he was! He just laughed an' caught her 'round the waist an' kissed her, an' said she herself was the brightest star of all. Then they ran off hand in hand, like two kids, too. All through those first few weeks your pa was just a great big baby with a new plaything. Then when college began he turned all at once into a full-grown man. An' just naturally your ma didn't know what to make of it."

"He couldn't explore the attic an' rig up in the old clothes there any more, nor romp through the garden, nor go lunchin' in the woods, nor none of the things she wanted him to do. He didn't have time. An' what made things worse, one of them comet-tails was comin' up in the sky, an' your pa didn't take no rest for watchin' for it, an' then studyin' of it when it got here."

"All through the first few weeks your pa was just like a great big baby with a new plaything."

(TO BE CONTINUED.)

NECKWEAR NOW IMPORTANT; FOR THE BATHING BEACH

RIBBONS and laces, maintain their places at the head of the procession, in decorative accessories, whether it be to "set off the faces" or do other service in the cause of beauty. They present nothing startlingly new, as yet, in neckwear, but gradually the frilled vestee and the jabot of lace are making headway, presaging a return of these flattering items with the early autumn styles. In the meantime the collar with vestee to match,

outward at the top or to extend around the neck in a wide upstanding flounce.

On the beaches interest is divided between the clothes of those who go in the water and those who stay out, with bathing suits, swimming suits and outing dresses all represented. When out of the water the swimmers are fortified by enveloping capes that allow only glimpses of their trim garb, but then capes are well worth

Some Pretty Ideas in Neckwear.

of lace, of lace and net, or lace and embroidered swiss, leads in summer neckwear, followed by the sleeveless under-bodice of net with collar and full frills of lace falling from the "V" shaped neck opening.

The collar and vestee sets include a straight collar to be pinned over the coat, dress or tuxedo sweater, and a straight vestee to be worn under them, without a blouse if the wearer so wills it. The sleeveless net waist with collar and frills of lace, shown at the bottom of the picture, is newer and very smart for this purpose. The pretty lace chemisette on the figure at the left of the picture is made of val lace, set in rows on a net foundation, and comes in handy whenever a low neck line needs filling in. The collar with cuffs to match of Irish crochet, filet or other good lace, on the

looking at. Some of the bathing suits are supplemented with them also; routine in high colors and with fanciful decorations, appears to be the best fabric for them. There are impressive outfits of this material, including a suit, cape, pillow and umbrella.

Bathing suits predominate on the beaches, and ground fabrics in them are mostly quiet in color, the designs modest and becoming. Much attention is given to the neck line, and many of them have cap sleeves. Jersey cloth is an ideal material for these with bodice and short skirt in one worn over knee-length bloomers or short pants.

The picture portrays two practical swimming suits in knitted fabrics, one of them in dark blue with white stripes and one in gray with bindings or short pants. A suit of gray jersey

Pretty Bathing and Beach Costumes.

dress at the right is an equally serviceable accessory.

A fascinating new item in accessories for the midseason appears in brilliant sports vests of gay elintz or cretonne. They are sleeveless with long arms-eye, they extend below the waist line and are to be worn under a coat or tuxedo sweater. But the thing that seizes the attention is their very high, standing collars, either shaped to flare

with simple embroidery in bands of yellow and orchid is pretty enough to challenge rivals and finds one at least in a suit of the same cloth embroidered in an all-over design in white wool.

WOMAN COULD NOT WORK

Made Strong and Well by Lydia E. Pinkham's Vegetable Compound

St. Paul, Minn.—"I took Lydia E. Pinkham's Vegetable Compound for a tired, worn-out feeling and painful periods. I used to get up with a pain in my head and pains in my low back and back. Often I was just able to do my work. I read in your little book about Lydia E. Pinkham's Vegetable Compound and I have taken it. I feel so well and strong and can do every bit of my work and not a pain in my back now. I recommend your medicine and you can use this letter as a testimonial."—Mrs. PHIL. MASER, 801 Winslow St., St. Paul, Minn.

Just another case where a woman found relief by taking Lydia E. Pinkham's Vegetable Compound. Many times these tired, worn-out feelings and pains about the body are from troubles only women have. The Vegetable Compound is especially adapted for just this condition. The good results are noted by the disagreeable symptoms passing away—one after another.

Lydia E. Pinkham's Vegetable Compound is a Woman's Medicine for Women's Ailments. Always reliable.

Better than Pills For Liver Ills. NR Tonight—Tomorrow Alright

Solution of "Lake of Mystery" Sought.

An attempt to solve the secret of Lake Eyre, called the "mystery lake," in the interior of Australia, soon will be made by a scientific expedition. The lake is 400 miles from the nearest settlement. Seven rivers from the hills, miles away, penetrate Australia's great interior desert and tumble their contents into the lake. In rainy season these rivers become enormous flooded areas. Without any apparent outlet, Lake Eyre, an inland sea as the result of the flooded rivers, contracts and becomes a lake again in a surprisingly short time.

Australian Cotton.

An exhibition of Australian grown cotton which was opened in Sydney drew attention to a new movement to cultivate cotton on a large scale in various parts of Australia. The Australian Cotton Growers' association is actively engaged in placing the industry on a stable basis, especially in Queensland and northern parts of New South Wales.

All Up.

The presiding officer at a Washington banquet recently introduced an innovation that will be appreciated by all baseball fans who have learned to practice and reverse it as an attraction. No doubt the banqueters enjoyed the surprise.

There had been two or three rather long-winded speeches following a somewhat gargantuan feast. The company had, in consequence, been seated continuously for more than two hours. Suddenly arising as if to announce the next spellbinder, the presiding officer rejoiced all hearts by saying: "Gentlemen, it's the seventh inning. Let's stretch!"—Judge.

Probably Needed It.

"Henry," said Mrs. Peckton, "I had some words with a traffic policeman this morning."

"Where was he stationed?"

"At the intersection of Plymouth and Spruce."

"I'll speak to the fellow at once."

"Don't offer him any violence, Henry."

"I won't. I'll offer him my sympathy."—Birmingham Age-Herald.

SQUEEZED TO DEATH

When the body begins to stiffen and movement becomes painful it is usually an indication that the kidneys are out of order. Keep these organs healthy by taking

GOLD MEDAL HAARLEM OIL CAPSULES

The world's standard remedy for kidney, liver, bladder and uric acid troubles. Famous since 1696. Take regularly and keep in good health. In three sizes, all druggists. Guaranteed as represented. Look for the name Gold Medal on every box and accept no imitation.

Comfort Your Skin With Cuticura Soap and Fragrant Talcum Soap 25c, Ointment 2 and 50c, Talcum 25c.

Something to Think About

By F. A. WALKER

ENCOURAGING WORDS

TO FORM a pleasant background or a pleasing accompaniment to the drudgery of every day life, pass around among the hordes of weary mortals whose backs are bent under heavy loads a few encouraging words and observe, while you are doing it, the happy change that comes over their stoical countenances.

It takes but little kindness and manifestation of interest to brighten dull eyes and move sad faces to a smile.

As the lips curl at the corners, you comprehend with a new understanding the value of cheering words spoken in a kindly voice whose ring is sincere.

Whatever opinion you may entertain as to the influence helpful acts and speech have upon others, you will find upon intimate observation that it is always acceptable, uplifting and productive of friendship.

Encouraging smiles and words are like bright lights on a dark highway, guiding the tired traveler to his destination, who but a little while ago had lost his way and fallen into the "slough of despond."

Reason as you may, the tongue plays the leading role in the great drama of life, permitting itself liberties that make for peace or war and enmity or love, often forgetting in an unguarded moment its great responsibility.

No man or woman who indulges in gross speech can expect to get anything in return except that which arouses resentment.

The Friendly Path

By Walter I. Robinson

READJUSTMENT

"MONEY grows or money goes." But it will neither grow nor leave one of its own accord.

Many persons have had these facts brought home to them with a jolt. Unfortunately, however, they did not recognize the value of what they obtained when it came in fast.

Harsh lessons are usually well learned. The man who foolishly trusts a rotten plank to carry him across a whirling stream and then pays for his life by a stiff fight for life, always is more careful when he must walk another plank to follow his pathway on the other side of a stream.

The same logic may justly be applied to every walk of life. If one spends all he earns, the money naturally goes; but, if he is wise and saves something, what he saves is certain to grow if properly invested. And it is surprising how fast it will grow and what an assistance it will become when the source of supply becomes weak or slow in producing.

Whatever the difficulties one has faced during the period of depression incident to readjustment of economic conditions, he still has much for which to offer thanks. Long faces and grumbling are inclined to increase the world's pessimism and hamper the progress back toward normalcy. It is far better to be a good sport—if we be permitted to use gaming

Mother's Cook Book

Today may be all that is mournful—our paths cannot always be bright. But tomorrow we'll somehow take courage.

And trustingly enter the fight.

EVERY DAY DISHES

WE WELCOME foods that give variety without adding to the expense of living, which is high enough with the best of management.

Date Surprise Cookies.

Stone dates and stuff with whole almonds blanched. Roll out the cookie mixture very thin, cut in rounds and place a stuffed date in the center; sprinkle with sugar and lemon rind mixed; fold over the cookie and pinch the edges together. Bake in a hot oven.

Pear Bread Pudding.

Slice canned pears in very small pieces; add lemon rind and juice and place half of them in a pudding dish. Mix one tablespoonful of butter with one-half cupful of sugar, one cupful of water and a pint of bread crumbs; spread all but a tablespoonful over the pears. Put more pears in the dish; add grated nutmeg and sprinkle with the tablespoonful of crumbs. Bake with a cover for an hour and a half, then remove the cover and brown. Serve with a hot sauce.

Rice and Asparagus Soup.

Wash the asparagus and cut off the tougher portions. Put the tips into a quart of well-seasoned broth and one cupful of water and cook until tender.

If you should incline to prove this for yourself, scold your pet dog. If the opposite you would verify, fill your purse tomorrow morning with kind words of encouragement, crisp as new bills, and pass them around as you wind your way to business.

Give one to the old newsman on the corner, and see his face light up as the sun of happiness touches his heart and suddenly warms his whole being.

Hand them out all along the way until you are ready to assume your duties of the day.

You may marvel as you begin at the ease and gladness with which you take up your work.

The troublesome perplexities of yesterday have vanished, and there is a goodly spirit hovering over you, whose presence you have not felt for months, and all because you started the day by cheering others and thus unconsciously cheered yourself.

SCHOOL DAYS

language—then one is more likely to see the brighter side.

Out of the struggles and discouragements the country and world at large have been experiencing, common sense will eventually rise to a higher plane than it has occupied for several years. And, though many may have foolishly spent all they earned when prosperity was with them and since have been finding it difficult to make both ends meet, when the tide turns back to normal, greater value will be placed on incomes, more caution will be exercised in spending, more money will be saved, simple and healthful pleasures will be appreciated and there will be wider appreciation of the privilege of earning fair wages or making fair profits on business done.

Painful though the lesson of readjustment is, it was necessary to assure honesty and happiness in the years to come.

KIDDIES SIX

By Will M. Maupin

THE DAY AFTER

"L ICKED to a frazz!" But, say, What is the use of repining? Home at the close of the day— Arms of our loved ones entwining. Out of the fret and the worry, Out of the din and the strife; Out of the battle and worry— Home and the joytime of life.

Downed in the battle! But, say, What is the profit in sorrow? Love is still lighting the way On to a glorious morrow. Out of the turmoil and fuming, Out of the worry and wiles, Love with its welcome is looming, Beckoning on with its smiles.

Whipped to a standstill! But, say, Still there is joy in the losing If love binds the wounds of the fray After the battle's confusing, Out of the smoke and the rattle, After the heat of the fray; After the din of the battle, Love lights the close of the day.

The Young Mother.

THE ILLS OF INFANTS AND CHILDREN should be so well known to the youngest of mothers that a reminder or a repetition of the symptoms of illness seems unnecessary, yet there are some mothers who overlook a feverish condition, a little colic, or a disposition to be irritable. If not corrected they may lead to serious sickness. And to correct them, to bring Baby back to its happy self, is so easy by the use of Castoria—a medicine prepared just for infants and children. It will regulate the bowels (not force them), aid digestion and so bring quiet and rest.

Fletcher's Castoria has been doing this for over 30 years; regulating the stomach and bowels of infants and children. It has replaced the nauseating Castor Oil, so-called Soothing Syrups, poisonous Paregoric and other vicious concoctions in the homes of true and honest mothers—mothers who love their children.

Those mothers will give their babies foods and medicines especially prepared for infants and children.

Exact Copy of Wrapper.

Children Cry For

Fletcher's CASTORIA

A Word About Truth.

"Great is Truth, and mighty above all things." So says the Old Testament, yet it is equally true to-day. Truth shows no favors, fears no enemies.

From the inception of Fletcher's Castoria, Truth has been the watchword, and to the conscientious adherence to this motto in the preparation of Fletcher's Castoria as well as in its advertising is due the secret of its popular demand.

All imitations, all substitutes, all just-as-good preparations lack the element of Truth, lack the righteousness of being, lack all semblance even in the words of those who would deceive.

And you! Mothers, mothers with the fate of the World in your hands, can you be deceived? Certainly not.

Fletcher's Castoria is prepared for Infants and Children. It is distinctly a remedy for the little ones. The BABY'S need for a medicine to take the place of Castor Oil, Paregoric and Soothing Syrups was the sole thought that led to its discovery. Never try to correct BABY'S troubles with a medicine that you would use for yourself.

MOTHERS SHOULD READ THE BOOKLET THAT IS AROUND EVERY BOTTLE OF FLETCHER'S CASTORIA

GENUINE CASTORIA ALWAYS

Bears the Signature of

Fletcher's Signature

THE CENTAUR COMPANY, NEW YORK CITY.

10 Cents Gives Cheerful New Color Tone to Old Curtains PUTNAM FADELESS DYES—dyes or tints as you wish

The Way of Today. "Hubby, baby wants a bedtime story." "Aw, call radio."—Louisville Courier-Journal.

Hobson's Choice.

He—"Do you believe in indiscriminate kissing?" She—"Oh, well it's better than none."

A Dove of a Girl.

"Has your typewriter a billing attachment?" "No, but she has a cooing attachment."

Most of man's hero worship is wasted on himself.

Blessed are they who know enough to let well enough alone.

It is a wise proverb that hasn't got a crack in it.

2 or 3 Cans of Baking Powder Are Not Worth the Price of One

If they are the "big can and cheap" kind because they may mean baking failures

THAT'S WHY

CALUMET

The Economy BAKING POWDER

Is the biggest selling brand in the world

Don't let a BIG CAN or a very low price mislead you.

Experimenting with an uncertain brand is expensive—because it WASTES time and money.

BEST BY TEST

The World's Greatest Baking Powder

THE CHEERFUL CHERUB

I like to hear the hymns in church, I feel uplifted in my heart, Especially when tenors sing Their extra little, squeezed-in part.

The juniper berry takes two years to ripen.

Hutchinson's
JOLIET, ILL.

"How We Cleared Our Summer Home of Rats," By Mrs. Perry.
When we opened our seaside home last May it was alive with rats. They'd gnawed all the upholstery. We cleaned them out in a week with RAT-SNAP. I prefer this rat killer because it comes in cake form—no mixing. Saves dirty hands and plates. Three sizes, 35c, 65c, \$1.25. Sold and guaranteed by Mokena Hardware Co., D. Kolber, Mokena.
"I Got Real Mad When I Lost My

Setting Hen," Mrs. Hannan.
"I went into the hen house one morning and found my favorite setter dead. I got real mad. Went to the store, bought some RAT-SNAP and in a week I got six dead rats. Everybody who raises poultry should keep RAT-SNAP." Three sizes, 35c, 65c, \$1.25. Sold and guaranteed by Mokena Hardware Co., D. Kolber, Mokena.

Mme. and Mlle. Joffre Visit America

Mme. Joffre, wife of the famous French marshal, and their daughter, who are making the tour of the world with Marshal Joffre. The party landed in Seattle the other day, and the ladies are getting their first views of the United States.

Temporary Perfection.
"Women never understand how useless it is to try to make a man think badly of the woman he loves; so long as he believes that she returns his passion she is, in his eyes, for the time being, perfect."—From "The Magic Power" by Tillie McLean.

Differing Tasks for Writer.
History can be formed from permanent monuments and records; but lives can only be written from personal knowledge which is growing every day less, and in a short time is lost forever.—Doctor Johnson.

Character Developed by Thrift.
Thrift is a general moral tonic. It develops character. It takes self-denial, and hence creates self-mastery which is the thing any human being most needs.—Dr. Frank Crane.

To Make World a Better Place.
The person who is not afraid of anything, who does the right thing because he believes it is the right thing, who is governed by faith and not by fear, is the admirable one. And if we can drive out ignorant fear and slavish apprehension much will have been accomplished to make the world a better place in which to live.—De Wolf Hopper, in New York Sun.

to consider and solve the printing problems for our customers, and each one we solve gives us just so much more experience to apply to the next one. This is what keeps us busy—this is why we are best equipped to do your printing in the way it should be done. Suppose you ask us to submit specimens and quote price.

We Make a Specialty of Printing FARM STATIONERY

Necessity for Saving.

Any man who cannot save money is bound to be dependent on relatives or charity when he attains old age and is unable to earn a salary.

CHICAGO RIDGE

Harry Smith, a boarder at Meyer's, working at the new cemetery, at 111th street and Ridgeland avenue, was kicked by a horse while working. His knee cap was knocked out of place. He was taken to the Burnside hospital. He was there a few days, but is back again, and has a very stiff leg.

Albert Emphie, who has just bought a Ford, came to Chicago Ridge to pay his folks a visit later in the afternoon. Cecil Cridgo and Albert went for a ride. They rode into the ditch at 107th street and Ridgeland avenue. They turned over once. No one was hurt, but the car was badly damaged. But they said they had "a good time."

Mr. and Mrs. Koble went to St. Louis over the Fourth to visit at Mrs. Koble's mother's home. They also took with them Mrs. Koble's sister, Margaret, who has been staying with her over the summer.

Mr. and Mrs. Duckwitz's son, Albert, wife and baby paid them a visit. They came in an auto from Madison, Wis. They stayed over the Fourth.

MARLEY

July 4th before sunrise the "Spirit of 1776 and 1914" started an alarm among the citizens of Marley, and all arose to celebrate. The gathering was at Storm's grove, where the Brotherhood arranged for the sports and refreshments. There was a patriotic speech by H. E. Rompel and music by a band of 35 pieces. A number of out-of-town people make this day an annual home coming.

Announcement has been received of the marriage of David Storm to Miss Carrie Huffer of Haven, Kansas, on July 2. After a tour to Colorado, they will motor back to Illinois, and will be at home at Joliet after July 15th. Mr. Storm has spent nearly all of his life at Marley, and his

many friends wish him and his bride much happiness.

A happy evening was spent at the Wermer home on Maple street on July 3rd, in honor of Louis Cleveland and Glen Cutler of Plainwell, Mich. About 20 young people were present. A weenie roast was one of the pastimes.

Willard Bush has accepted a position as guard at the State prison at Joliet.

James Aspel and family moved Wednesday to Lockport, Ill., where they have bought a home. We regret this, as they have lived at Marley for about 10 years, and have been interested in school politics and social events.

FRANKFORT

William Deist, who was operated on for appendicitis at the Silver Cross hospital, Joliet, last week, is doing nicely.

Edwin Ohlendorf, who also underwent an operation for appendicitis at the same hospital, is also much improved.

William Green, his father, F. L. Randall, and his uncle, George H. Green, visited in Chicago one day last week.

The Frankfort brass band played at the German M. E. Sunday school picnic at Tinley Park Thursday afternoon.

At Frankfort a Fourth of July celebration was held at Borman's grove, July 4. There were also two ball games in the afternoon between Frankfort, Orland and Manhattan. Manhattan played Orland the first game and lost. There were only seven innings the first game, because there was not enough time for nine. Frankfort played the winner, Orland, a nine inning game and won, 7 to 4, winning a purse of \$100.

There was held recently in Pfaff's barber shop, in Frankfort, a Charlie Chaplin mustache bet between "Dave" Balchowsky and "Pat" Walsh, the purse to be \$2.00. The one that shaves it off first, loses the money; otherwise, the one who grows it the quickest,

wins. Pat's is getting along nicely now, although there are some doubtful ones of the opinion that he might get "cold feet" and shave his off. Certain it is that it is "nip and tuck" at present.

On account of illness of the pastor, Rev. Theodore Miner, the services of the M. E. church in Frankfort were conducted by Mr. Erkhardt. Miss Baumgartner gave a talk on missions, in Sunday school.

TINLEY PARK

The German M. E. Sunday school picnic held at the Conrad Andres orchard, last Thursday, was a big success. There was a big crowd, and all had a good time. The Frankfort brass band furnished the music in the evening. A good program was given in connection with the other festivities.

The German M. E. Epworth League meets Sunday night.

On Sunday the Lord's Supper will be observed at the German M. E. church. Rev. Joehum of Michigan City, Ind., will be in charge of the services.

Mokena

Mr. and Mrs. Chester McGovney and children of Chicago spent the Fourth at the Ona McGovney home.

Mildred Butler entertained in honor of her nephew, Elwyn Burlingame's fifth birthday, Thursday afternoon, from 2 to 5.

Mr. and Mrs. Burlingame and family and Mrs. Butler and daughter called on friends in Homer the Fourth.

Mr. and Mrs. Burlingame entertained friends from Hinsdale over the week end.

Uncle Eben.

"Form will tell," said Uncle Eben. "Dat story 'bout de hare an' de tortoise describes a fluke dat made a good moral lesson. Jes' de same, if I ever gits a chance at dat kind of a race I's gineter bet on de rabbit."

Personality

Your eyes have a great deal to do with your personality. Eyes strained and weakened through defects of vision do not look or function naturally. Glasses may be fitted so becomingly that they build up personality.

You will find the right optical science here. The kind you need and will appreciate.

TRY US.

Juvenile Reasoning.

Roland was carrying in wood from a pile his father had just split, and instead of taking it from the side nearest the house he went around on the other side every time, thus decreasing the size of the pile from the back. His father asked why he didn't take it from the side nearest and he replied: "Well, after a while I'll be tired, and then I won't have so far to go for it."

Is Ancient Salutation.

The salutation of English-speaking races of shaking hands is very ancient. It is mentioned by Homer, Aristophanes, and by Virgil. As the confirmation of a bargain it appears in II Kings 10:15. It is nevertheless practically relegated to the Anglo-Saxon races today.

Cold—in the Head and the Heart.
"I suppose there are more fool suggestions for holding love than for curing colds. Every daily paper is full of both, and none of them is any good either for cold hearts or noses."
—From "Beauty," by Rupert Hughes.

Fond Hearts Parted.

My earliest love affair, writes a correspondent, was no funny matter at all. In fact I cannot think of it even now without an ache in my heart. I was only fourteen years and he three years my senior. All might have been well, but—parental objections. We were parted, to drift further apart as the years rolled on. I am married now, but not to my first and tenderest love!

Honey and Wax in Church Ritual.

Honey and wax were early believed to have medicinal and magical properties, and were, of course, used for sacrificial purposes. Their ritual value is apparent also in the Christian cult, for honey was formerly given to babies during baptism, and the tapers in churches today are supposed to be of pure bees' wax.

Opal's Bad Reputation.

The opal was given its bad name by the Rabbi Benoni in the fourteenth century, and has never quite lived it down. According to Benoni it is fatal to love and sows discord between giver and receiver. Another authority says that, given as an engagement token, it is sure to bring bad luck. Nevertheless, there is one month in the year in which it is the emblem of hope and perhaps even good fortune. October's children may receive and wear opals without any ill consequences.

Stamp Fancier Sets New Record.

The largest stamp collection in the world was made by the late Baron Philip Von Ferray, who died in Paris in 1917. The collection is said to have contained a used and unused specimen of every postage stamp issued down to the end of the Nineteenth century.

Form

your own opinion of the quality of printing we turn out by looking over the samples we will be glad to show you. There is nothing in this line that we

can't do to your entire satisfaction. High-class printing creates a good impression for you and your business.

Consult 33-37, 5th Ave. You Send Your Work Out of Town

Real Success.
That is failure when a man's idea ruins him, when he is dwarfed by it; but when he is ever growing by it, ever true to it, and does not lose it by any partial or immediate failures—that is success, whatever it seems to the world.—A. Bronson Alcott.

Weather Vanes.
A weather vane should be made of metal, preferably of brass, bronze or copper, as these substances are cheap and do not rust. There should be two vanes, separated by an angle of about 22 degrees. It has been found that the double vane form was more responsive to slight changes in the direction of the wind than the single vane form.

Transatlantic Voyages.
In 1838 the first regular steamboat service across the Atlantic was established, the voyage occupying 17 days. In 1900 the record yacht passage across the Atlantic—13 days and 20 hours—was accomplished.

Come In

and see us the next time you are in need of good printing. We are specialists in the kind of work that pleases.

A trial is all we ask.

Beach's July Cost Clearing Sale

MOKENA

Dan and Alphonse Kohl arrived Sunday from Mason, S. D., where they went some time ago for the benefit of Dan's health, but as he grew steadily worse, they had to return. Inflammatory rheumatism has set in, and Dan is unable to walk. The trip was over 1,000 miles, and was made in four days. The Northwest is having a bumper grain crop this year, as there has been plenty of rain. South Dakota, North Dakota, Minnesota, Montana and other Western and Northwestern States report one of the biggest crops in many years. Kohl Bros. had quite an experience with flooded streams. Many bridges were washed out, and they had to detour many miles to cross the rivers.

The Mokena village water department has been shut down for a few days this week, on account of the water tank being cleaned. The tank is also being given an outside coat of paint. Mr. Clark, a steely jack of Chicago, being in charge of the work.

Mrs. John Wannamacher has returned from Fairmont, Minn., where she attended the funeral of her sister-in-law, Mrs. John Werner, who had spent last year with the former in Mokena. The deceased is the mother of Edward Werner.

A company of relatives gathered at the home of Mr. and Mrs. Jay Butler, Thursday, to celebrate the latter's birthday.

Mr. and Mrs. Geo. F. Schoel and daughter Josephine, Mr. and Mrs. Oscar Bach, Mr. and Mrs. W. E. Houchin and Miss L. A. Justus all of Chicago, visited with Mrs. John Semmler, Sunday.

Mr. and Mrs. Frank Hirsch, Jr., Mr. and Mrs. Harry Mall and Mr. and Mrs. Frank Hirsch, Sr., have returned from an outing to Lake Delavan, Wis.

Mr. and Mrs. George Woodcock and daughter Irene of Spurling, Canada, have been guests at the J. W. Matten home.

Grandma Eggers is very ill and confined to her bed steadily.

Mrs. Emma Bechstein and daughter Edna have been enjoying a two weeks' outing spent at Seneca with friends and a trip to Starved Rock.

Eiss Emma McGovney, who has been visiting with Mokena relatives, has returned to Blue Island.

16 Electric Generating Plants
7 Gas Manufacturing Plants
700 Miles Electric Transmission Lines
900 Miles Gas Mains
5,800 Square Miles of Territory Served
1,157,000 Population

Great Electric and Gas Belt Increasing in Its Prosperity

MARKED industrial revival and greatly enlarged building activity is noted in the industrial and residential districts on Chicago's fringe.

Chicago is bounded on the East by Lake Michigan, on the North, South, and West by the electric transmission lines and gas mains of the PUBLIC SERVICE COMPANY OF NORTHERN ILLINOIS.

The electric power business of this company shows an increase of 24 per cent compared with Jan. 1. Electric lighting business has increased 15 per cent. Sales of gas for industrial purposes are 12 per cent higher than in the corresponding period of 1921.

Every move of an industrial plant to Chicago's outskirts and suburbs or of a citizen to territory adjacent to the city, means added electric and gas business for the PUBLIC SERVICE COMPANY.

A territory of 5,800 square miles, whose population is in excess of 1,157,000 is served by the company's 7 gas manufacturing plants and 16 electric generating plants. Its 700 miles of high-tension electric transmission lines and 900 miles of gas mains serve, not only the great industrial and residential districts surrounding Chicago, extending from the Wisconsin state line, on the North to the Indiana state line on the South, but sweep in a Westerly and Southerly direction as far as the Northeastern corner of Peoria County, crossing the rich agricultural and dairying regions.

As evidence of the great progress Northern Illinois has already made is the fact that the electricity sales of the PUBLIC SERVICE COMPANY OF NORTHERN ILLINOIS have increased nearly 450 per cent in the past ten years.

"Depression" Is Passing

Trained observers of business declare that conditions are steadily improving. There is business for those who go after it. But all are agreed that a superior quality of salesmanship is demanded.

We believe that nothing will give greater impetus to the return to normal conditions in trade than a wise use of Bell Long-Distance telephone service. It is the personal touch which counts in competitive salesmanship and this touch is obtained in a dignified, effective manner by telephone.

Our "station-to-station" service is quick and reliable and the rates offer a saving of about twenty-five per cent. Bell Lines Reach Everywhere

NEW CONSTITUTION READY FOR VOTERS

PROPOSED BASIC LAW ADOPTED
BY ILLINOIS CONSTITU-
TIONAL CONVENTION.

SPECIAL ELECTION DAY SET

People of the State Will Express Their
Favor or Opposition on December 12
—If Approved by Majority It Will Be-
come Effective on January 15, 1923.

Springfield, June 29.—Illinois' proposed new constitution, adopted by the constitutional convention, to be submitted to the voters of the state at a special election to be held on December 12, contains changes and additions as follows:

Article I.—Bill of Rights.—All men are by nature free and independent and have certain inherent and inalienable rights; among these are life, liberty and the pursuit of happiness. To secure these rights and the protection of property, governments are instituted among men, deriving their just powers from the consent of the governed. A frequent recurrence to the fundamental principles of civil government is necessary to preserve the blessings of liberty.

No person shall be deprived of life, liberty or property without due process of law.

The free exercise and enjoyment of religious profession and worship without discrimination shall forever be guaranteed. No person shall be denied any civil or political right, privilege or capacity on account of his religious opinions. The liberty of conscience hereby secured shall not be construed to dispense with oaths or affirmations, excuse acts of licentiousness or justify practices inconsistent with the peace and safety of the state. No person shall be required to attend or support any ministry or place of worship against his consent nor shall any preference be given by law to any religious denomination or mode of worship. The reading of selections from any version of the Old and New Testaments in the public schools without comment shall never be held to be in conflict with this constitution. (The latter sentence was adopted after long debate and is a new provision.)

Every person may freely speak, write or publish on any subject, but is responsible for the abuse of this liberty. In trials for libel, civil or criminal, the truth when published with good motives and for justifiable ends is a sufficient defense.

The right of trial by jury shall remain inviolate, but may be waived except in capital cases. The general assembly may provide that women may be eligible to serve as jurors. Juries of less than twelve in civil cases may be authorized by law.

The general assembly may provide that women may be eligible to serve as jurors. Juries of less than 12 in civil cases may be authorized by law. Excessive bail shall not be required. The privilege of the writ of habeas corpus shall not be suspended unless in the case of rebellion or invasion the public safety may require it.

Offenses which may be punished by imprisonment may be prosecuted by indictment or on information filed by the attorney general, or by a state's attorney.

Laws shall be applicable alike to all citizens without regard to race or color.

Article III.—Legislative Department.—Reapportionment time is changed from twelve to ten years. Senatorial districts are changed from fifty-one to fifty-seven. The number of representatives remains the same, but one is elected from each of the 153 districts instead of three from each senatorial district. Cook county is limited to 10 districts for senators, but is not limited as to representatives.

The bar against dual office holding is made stronger. Provisions for safeguarding the spending of state money.

Every bill shall be read by title on three different days in each house. The zoning provision is new in the constitution, although previously in the statutes.

Provision for lending money on farm lands in the state.

The general assembly at the regular sessions in nineteen hundred twenty-three, nineteen hundred thirty-three and every twelve years thereafter shall apportion the state into fifty-seven senatorial districts, each of which shall elect one senator, and into one hundred fifty-three representative districts, each of which shall elect one representative. The basis of apportionment for both houses shall be the number voting for governor at the last regular election for that office previous to the apportionment. Every district shall be formed of compact and contiguous territory and shall be bounded by county lines except in counties comprising two or more districts, when such districts may be bounded by precinct or ward lines.

At each apportionment the number so voting in the entire state shall be divided by one hundred fifty-three, and the quotient shall be the representative ratio for the state. Representative districts shall contain as nearly as practicable the representative ratio. No district shall contain less than four-fifths of the representative ratio. But a county having less than four-fifths of the ratio may be joined with an adjoining county having less than the

ratio in forming a district; counties having less than four-fifths of the ratio may be formed into districts of one or more counties; such districts shall be as near the ratio as practicable; and when of more than one county such counties shall be adjoining. Counties comprising not less than one ratio and three-fourths shall be divided into two or more districts. Each district in counties comprising more than two districts shall contain at least the full ratio.

The general assembly shall convene at noon on Wednesday after the first Monday in January in odd numbered years. The secretary of state shall preside over the house of representatives until a temporary presiding officer is chosen who shall preside until a speaker is chosen. The lieutenant governor shall preside over the senate and may vote in case of tie. The senate shall choose a president to preside during the absence or pending the impeachment of the lieutenant governor or while he acts as governor.

The governor may convene the general assembly by proclamation or extraordinary occasions, but it shall enter upon no business save that stated in the proclamation or in one additional message from the governor during the session.

Article IV.—Executive Department.—The governor and lieutenant governor each shall be at least thirty-five years of age and a citizen of the state for ten years next before his election.

The term of office of treasurer is increased from two to four years and the period of disbarment is lengthened accordingly.

Permitting the governor to call out armed forces of the state to "protect life or property."

State treasurer shall show daily balances of state funds (as part of each semi-annual report) and where deposited, and shall show payments of interest received.

State auditor shall publish within sixty days after the adjournment of each session of the legislature itemized statement showing the expenses of the session.

Article V.—Judicial Department.—Includes proposed sweeping revision of the judicial department, including the consolidation of the courts of Cook county and the establishment of uniform procedure under the control of the supreme court.

In an emergency the governor shall designate a judge of one of the appellate courts to act as a justice of the supreme court until the vacancy is filled.

Provision for uniformity of procedure in all courts.

Territory comprising county of Cook shall constitute one circuit and have a circuit court with original jurisdiction of all cases.

Supreme court shall establish a civil division and a criminal division of the circuit court of Cook county. Shall designate a judge to act as chief justice of each division. May authorize the chief justices jointly.

Provision for a referendum upon establishment of system of appointment of circuit judges in Cook county.

Chief justice of the civil division of the circuit court of Cook county shall appoint a justice of the peace and a constable in each town or portion of a town in the county outside the city of Chicago, each of whom shall hold office for two years. Additional justice of the peace and constable may be appointed in for every 10,000 additional population, or major portion above the population of 10,000. Salaries to be fixed and paid by county board.

Justices of the supreme court and judges of the appellate and circuit courts shall be at least thirty-five years of age and for at least ten years shall have been licensed to practice law in this state and for such time shall have been engaged in the practice of law in this state or acted as judicial officers or both.

There shall be elected to the office of judge of the circuit court of Cook county on the first Monday of June, nineteen hundred thirty-one, nineteen judges as successors to the judges whose terms expire in that year; on the first Monday of June, nineteen hundred thirty-three, nineteen judges as successors to the judges whose terms expire in that year; on the first Monday of June, nineteen hundred thirty-five, twenty judges as successors to the judges whose terms expire in that year. Thereafter on the first Monday of June of the year in which the terms of any judges of that court expire, and every six years thereafter successors to such judges shall be elected. Provision may be made by law for the election of an additional judge for every fifty thousand population in the county above three million four hundred thousand. The number of judges may also be reduced by law.

Judges of the circuit court of Cook county shall be elected for terms of six years from the date of their election. At all elections for judges the ballots therefor shall be separate and distinct from the ballots for non-judicial officers.

The circuit court of Cook county shall sit in the city of Chicago but provision may be made by law for holding sessions in other cities, villages or incorporated towns in the county having a population of at least 5,000 whenever suitable facilities for holding court are provided and maintained without expense to the county or state.

Article VII.—Revenue and Finance.—Taxes on income shall be levied and collected only by the state. The revenue raised under the income tax shall be apportioned to the state and to the taxing bodies as the general assembly may prescribe.

No money shall be drawn from the state treasury except under an appropriation made by law and on presentation of a warrant issued by the auditor of public accounts. (The debt limit is raised here from \$250,000.)

Municipalities are permitted to become indebted in the aggregate, including existing debt, to an amount not exceeding six per cent. (In the old constitution all municipalities were held in the five per cent limit.)

Article VIII.—Local Governments.—No county seat shall be removed unless three-fourths of those voting on the question shall approve the removal to the place designated, except that a majority only shall be required to remove a county seat nearer to the center of the county. (The old provision requires a three-fifths vote to remove county seat.)

The general assembly may consolidate with the city of Chicago the portion of the county of Cook lying within the city. Home rule for Chicago is provided, and power also is given the city to draft its own charter. Consolidation sections permit the city of Chicago to become indebted in the aggregate up to seven per cent of the full value of the taxable real property.

Neither the county of Cook nor any city, town, school district, or other municipal corporation in the county shall become indebted in the aggregate, including its existing debt, to an amount exceeding seven per cent of the value of the taxable real property. (This is an increase of two per cent.) Provisions are made for to permit Chicago to incur indebtedness to pay for public utilities.

Article IX.—Public Servants.—No statute of limitation shall begin to run in favor of a public officer until an audit of his accounts has been made as provided by law.

Article XI.—Militia.—The militia of the state of Illinois shall consist of all able-bodied male persons resident in the state between the ages of eighteen and forty-five, except such persons as now are or hereafter may be exempted by the laws of the United States or of this state. No person, because of conscientious scruples against bearing arms, shall be exempted by the laws of this state from any military service declared by the governor to be noncombatant. (Under the old constitution conscientious objectors were not compelled to do militia duty in time of peace providing they paid an equivalent for their exemption.)

Article XIII.—Canals and Waterways.—In addition to the proceeds of the \$20,000,000 of bonds heretofore authorized for the deep waterway, \$10,000,000 may be expended therefor and all or part thereof secured by issuing bonds. The state shall make no other expenditure for any canal or waterway or appurtenance thereto except from the income thereof unless the expenditure is approved by a majority of all those voting at a general election. (The expenditure here is raised \$10,000,000.)

Article XIV.—Amendments to the Constitution.—Whenever two-thirds of the members of each house of the general assembly by a vote entered upon the journals concur that a convention is necessary to revise, alter or amend the constitution, the question shall be submitted to the electors at the next general election. If a majority voting at the election vote for a convention, the general assembly at the next session shall provide for a convention to consist of twice the number of members of the senate to be elected in the same manner, at the same places and in the same districts as senators, plus seven members to be elected at large from the county of Cook.

Broader amending power is provided than given by the present constitution, which prohibits amendments to more than one article at the same session and to the same article more than once in four years.

Provision is made for the referendum upon the adoption of the constitution necessary to meet the contingencies that would arise if it were adopted. The ballots to be used at such election shall be substantially in the following form:

Shall the Proposed	YES
New Constitution	
Be Adopted?	NO

The elector shall designate his vote by a cross mark thus X, to be placed in one of the squares on the right hand margin of the ballot.

The ballots cast for and against the adoption of this constitution shall be received and canvassed by the judges and clerks of such election and returned as provided by law for general elections.

Within 15 days after such election returns thereof shall be made by the several county clerks to the secretary of state which shall show (a) the aggregate number of electors voting in each county, (b) the aggregate number of votes cast for the adoption of this constitution, and (c) the aggregate number of votes cast, against the adoption of this constitution. Such returns shall within ten days thereafter be examined and canvassed by the secretary of state, the attorney general, the state treasurer, and the auditor of public accounts, or any three of them, in the presence of the governor, and proclamation shall be made by the governor forthwith of the result of the canvass. If it appears that a majority of the votes cast are for the adoption of the new constitution it shall be the supreme law of the state of Illinois on and after twelve o'clock noon of Monday, the 15th day of January, 1923, and the existing constitution shall thereupon cease in all its provisions.

LESSON FOR JULY 9

DANIEL INTERPRETING NEBU-
CHADNEZZAR'S DREAM

LESSON TEXT.—Daniel 2. GOLDEN TEXT.—The kingdoms of this world are become the kingdoms of our Lord, and of His Christ; and He shall reign forever and ever.—Rev. 11:15. REFERENCE MATERIAL.—Isa. 9:6, 7:13, 14:47; John 18:33-38. PRIMARY TOPIC.—How God Answered Daniel's Prayer. JUNIOR TOPIC.—Daniel Reveals the King's Dream. INTERMEDIATE AND SENIOR TOPIC.—How Daniel Met a Severe Test. YOUNG PEOPLE AND ADULT TOPIC.—God's World-Kingdom: Its Nature and Method.

I. Nebuchadnezzar's Dream (vv. 1-13).

This dream made a tremendous impression upon the king's mind, but he had forgotten its content. He urgently demanded of the wise men that they make known the dream and its interpretation. Because of their failure the king was very furious and commanded all the wise men of Babylon to be slain.

II. The Revelation of the Dream (vv. 14-35).

When the decree was in process of execution Daniel was sought out to be slain. He sought an interview with the king and obtained time. Note:

1. The prayer meeting in Babylon (vv. 14-18). Daniel was the leader in that prayer meeting. He called his fellows together and most definitely prayed to God. Their lives were at stake; their need was great.

2. Daniel's ascription of praise to God (vv. 19-23). God heard their prayer and Daniel responded in lofty strains of praise to God.

3. Daniel before the king (vv. 24-30). Because he had been with the Lord and had obtained wisdom, he was confident before the great king.

4. The content of the dream (vv. 31-35). Daniel made known to the king that in his dream he had beheld a great image with a head of gold, breast and arms of silver, belly and thighs of brass, legs of iron and feet of iron and part of clay. He beheld the image smitten by a stone and the stone became a great mountain.

III. The Interpretation of the Dream (vv. 36-48).

1. The head of gold represented the Chaldean monarchy with Nebuchadnezzar as its head (vv. 37, 38). With the accession of Nebuchadnezzar to the throne, the times of the Gentiles began.

2. The breast and arms of silver represented the Medo-Persian power (v. 39). The Medo-Persian empire was a kingdom inferior to the Chaldean.

3. The belly and thighs of brass represented the Grecian empire under Alexander the Great (v. 39).

4. The legs of iron represented the Roman empire (vv. 40-43).

(1) The two legs represented the eastern and western divisions of the Roman empire. (2) The feet of iron and clay represented the two elements of human government, which inhered in the Roman empire and are present today in all forms of government, namely, absolutism and socialism, or imperialism and democracy. These elements have no coherency.

5. The stone cut out of the mountain (vv. 44, 45). This is the kingdom of heaven so graphically set forth in the New Testament, for the kingdom of heaven is the kingdom which the God of heaven shall set up. (1) The stone is Christ (Isa. 28:16; Matt. 21:42-44). (2) When did the stone strike? The impact of the stone was upon the feet of the columns (v. 34). This shows that it did not strike at Christ's first coming, for the Roman empire was a unit at that time; not even the division of the empire as represented by the two legs had taken place as yet. The stone smiting the feet shows that the stone will strike when the Roman empire shall have been divided up into ten kingdoms. (3) The kingdom of heaven is thus seen to be brought into realization through a great catastrophe. The end is not by gradual and peaceful extension through preaching the gospel, but by a crushing blow. The stone does not fill the earth by crowding the colossus out, neither by securing its submission to God, but destroying it. Gentle dominion shall end in a crash; upon its ruins shall be built the kingdom of heaven. The action of the stone is of judgment, not grace. The text plainly says it is "after" the stone has done its smiting work that it becomes a great mountain and fills the whole earth (see Psalms 2: 5, 6; Zech. 14:1-9). Just as the first part of this dream was literally fulfilled, so shall the last part be fulfilled. Messiah's kingdom shall be a real and literal kingdom.

News Spreads of Miracles. Jesus went over the sea of Galilee, and a great multitude followed him, because they saw his miracles which he did on them that were diseased.—John 6:1 and 2.

Forgiveness of Sins. Blessed are they whose iniquities are forgiven, and whose sins are covered.—Romans 4:7.

Influence. Influence is the exhalation of character.—W. M. Taylor.

BOWRON SOUGHT RELIEF 40 YEARS

Tanlac Restores Los Angeles Man to
Splendid Health After Every-
thing Else Had Failed.

"Tanlac has done me more good than all other medicines and treatments combined, and that's saying a great deal, for I was a sufferer from indigestion forty years and have tried every kind of medicine that came my way," said R. H. Bowron, 1635 W. 17th St., Los Angeles, Cal.

"I could hardly stand the bad spells I frequently had with my stomach. I was weak and nervous, had no appetite, and I felt miserable generally. Nothing I took gave me more than temporary relief and I gradually grew worse. "About two years ago Tanlac put me in splendid condition and it has been my standby ever since. Whenever I get to feeling a little off, a bottle or two puts me in fine shape. I eat heartily now, sleep fine, have no distress after meals, and, in fact, am enjoying splendid health. 'Tanlac is just the thing for those who suffer as I did.'"

Tanlac is sold by all good druggists.

VAST RICHES OF OLD SPAIN

Luxury Surrounding Grandees of
Three Centuries Ago Can Hard-
ly Be Imagined.

The luxury displayed at the present age by the great of Spain can in no way compare with that of their ancestors of three centuries ago.

The duke of Albuquerque, we were told recently by the marquis of San Simon, can boast of being the owner of many pieces of furniture made of silver left to him by his father.

In order to weigh and make the inventory of the silver and gold table-sets which were left, it was necessary to devote two hours per day for a period of six weeks. There were 1,400 dozens of dinner plates, 500 large platters and 700 smaller ones, all else being in proportion to this magnificence. Among other relics he has 40 silver step-ladders which were used to ascend to the tops of the cupboards which held these treasures.

The duke of Alba, who says that his father was not the richest, had left him 600 dozens of dinner plates and 800 platters made of wrought silver.

Don't Forget Cuticura Talcum When adding to your toilet requisites. An exquisite face, skin, baby and dusting powder and perfume, rendering other perfumes superfluous. You may rely on it because one of the Cuticura Trio (Soap, Ointment and Talcum). 25c each everywhere.—Advertisement.

Classy Dressers in 1776. The following was the uniform for the officers of the corps, by order of the "Marine Committee," dated September 5, 1776: "A green coat faced with white, round cuff, slashed sleeves and pockets, with buttons round the cuff, skirts turned back, buttons to suit the facings; white waistcoat and breeches edged with green, black garters and garters." The order also stated that green shirts were ordered for the men "if they can be procured."

Spring Weather. "Why have you let your entire force go to the ball game?" "Well, I get very little work out of them in spring. All their efforts go to putting the windows up and down."—Louisville Courier-Journal.

RADIO

MORE ABOUT VACUUM TUBE AS A DETECTOR

How a "Three-Electrode" Is Connected in a Simple Radio Receiving Circuit.

Obviously working the tube at a point on the upper bend of knee of the characteristic curve would produce the same symmetrical changes in the plate circuit by symmetrical changes in the grid potential as it will if the tube is worked at the lower end of

Fig. X

knee of the curve. However, the alternating current applied to the grid would now produce a large decrease and a small increase of the plate current, the reverse of that shown in Fig. 9. The objection to working the tube on the upper bend of knee of the curve is that when no potential is applied to the grid a relatively large

plate circuit current and the tube would not function as a detector.

Fig. 10 shows how a three-electrode vacuum tube is connected in a simple radio receiving circuit. The "B" battery furnishing the necessary plate potential is connected with its positive side through the phones to the plate. The filament is heated to the required temperature by the battery "A." The incoming radio frequency alternating current is applied to the grid and the negative side of the filament through the "C" battery. By connecting the negative side of the filament to the midpoint of the "C" battery a positive potential can be applied to the grid by moving the slider on the "C" battery potentiometer up, or the grid can be made negative with respect to the filament by moving the slider on the "C" battery potentiometer down.

In practice a "C" battery is not used to force a three-electrode vacuum tube to function as a detector.

Fig. 11 shows how a so-called grid condenser and a grid leak resistance are used in conjunction with a three-electrode vacuum tube so that it will function as a detector in a radio receiving circuit.

The grid condenser is connected in series with the grid of the tube and shunted by the grid leak resistance.

Fig. XI

current would flow in the plate circuit and rapidly exhaust the "B" battery.

Should the tube, by means of the potential applied to the grid, be made to operate at a point on the characteristic curve midway between the upper and lower bends—that is, on the straight part of the curve, symmetrical variations in the grid potential would cause symmetrical change in the

The grid condenser will allow alternating current to flow to the grid but will not allow any charge that might collect on the grid to flow through it to the filament. The only way a charge that might collect on the grid could flow to the filament would be through the high resistance of about 500,000 to 2,000,000 ohms and would allow the charge on the grid to leak off slowly.

USING ELECTRIC LIGHT WIRE

Experts Tell the Safe Way to Employ This System for Radio Receiving.

Since the announcement that the bureau of standards of the department of commerce had perfected a method of employing electric light wires in place of aerials, considerable experimenting has been done by various amateurs, some of whom have had good luck while others succeeded only in blowing a large number of fuses.

Engineers of an eastern electric light company have offered the following suggestions to amateurs:

"First—Successful results have been obtained so far only with audio bulb sets. Crystal sets receive the signals, but for some reason they are very weak and indistinct.

"Second—No set should be used on this system without air or oil filled condensers, placed in series with either the antenna circuit or the ground circuit—preferably in the antenna circuit.

"Third—A fuse not heavier than one-half ampere should be used in series and just ahead of the antenna connection.

"Fourth—An ordinary separate detachment plug—i. e., one with two blades connecting the two separate halves of the plug—is used. Only one wire is run from this plug, the other binding screw left undisturbed. This single conductor wire should be long enough to reach from a handy electric light socket to the table where the instrument is located and should terminate in the fuse mentioned above. In case an externally connected condenser is used, the circuit should be run from the fuse to the condenser and from the condenser to the antenna binding post of the receiving set.

"In sets where the condenser is built into the instrument the connection from the fuse is run directly to the antenna binding post. All other connections should be exactly the same as for conventional overhead aerial receiving.

"Screw the attachment plug into the electric light socket and tune as usual. In case no signals are received reverse the blades in the attachment plug by simply pulling the attachment

plug apart and turning the lower half half-way around.

"Caution—Under no consideration should the connection from the electric light socket be brought directly into contact with the ground connection, or fuses will be blown in the house circuit and the whole house left without light. Operators should also be careful about making contact themselves bodily with the electric light wire and ground at the same time, in order to avoid shock."

SHORT FLASHES

The first national radio compass station on the Great Lakes was recently installed. Other stations will shortly be in service when the "graveyard" of the lakes will have lost its terrors.

It is claimed that John Hayes Hammond, Jr., and Dr. E. L. Chaffee have invented an appliance that insures secrecy in wireless. The system is based on principle of producing characteristic waves to which only especially equipped receivers are responsive.

Secretary Hoover's force of "ether cops" may take the form of special government detecting stations where aerial compasses could be arranged so as to detect the direction from which interruptions come. By a series of relays, the government station nearest the violating amateur could be notified and the source of trouble stopped.

Now the fans in England are having a hard time with their air. According to a report from England there are only 8,000 authorized amateur operators in the United Kingdom. The London Daily Mail states that the reason for the art's tardy growth is the fact that "hampering and senseless restrictions in this country prevent wireless amateurs from getting practice. The old fogies of the army and navy air forces are afraid of the amateurs and use their influence in having the postoffice authorities impose impossible and vexatious restrictions that limit the field."

ILLINOIS BREVITIES

Agitation to obtain state aid in reclaiming nearly 1,000 acres in the Spring lake drainage district, near Pekin, is being renewed. It has been proposed that the state drain this territory and divide it into 40-acre tracts to be sold at a reasonable price.

Dairy farmers in the zone which supplies Chicago with milk will receive \$2 a hundred for their product during July, \$2.05 in August, and \$2 in September, it was announced after an eight-hour session of the Milk Producers' association and the big Chicago distributors.

Plans for the furnishing of the new Centennial building at Springfield are going on rapidly forward as the stately edifice nears completion. Dr. A. R. Crook curator of the state museum, is arranging details for the removal of many fine exhibits now in the museum to the Centennial building. Many of the animal groups and painted backgrounds for them have been planned.

Three of the twelve wounded men of the recent mine massacre at Herrin were taken from the hospital a few days ago by a state investigator and put on a train for Springfield. While no apparent signs of demonstration were seen, Mayor Pace and several policemen accompanied the party to the train. Several of the remaining nine wounded are still in a critical condition.

The old bridge which Abraham Lincoln used in going to and from his home in Old Salem is to be remodeled by the state department of public works and buildings. The historic road between Old Salem and Springfield will also be improved. The structure is known as the "Old Salem bridge." It is to be replaced with a bridge of concrete. Specifications provide that this bridge must be completed by September 1.

Miss Irene V. Livingstone of White Hall has a school record that is believed to be the equal of any in the state. Graduating from White Hall high school this year, Miss Livingstone has not been tardy or absent once since entering school at the age of six years. Miss Livingstone stood at the head of her classes throughout the high school course. She captured the highest honors in the senior class.

One-day poultry schools are being arranged by county farm advisors in six counties and the animal husbandry department, University of Illinois. Professor Card will have charge of the schools which will be held as follows: Carbondale, July 6; Belleville, July 7; Springfield, July 10; Galesburg, July 11; Dixon, July 12; and Urbana, July 18. Feeding, culling and sanitation problems will be considered at the schools and part of the program will be to cull a farm flock.

For the first time in 40 years night riders broke out in Saline county. Twenty-five masked men visited the home of Edward Ford, near Harrisburg, and gave him a severe whipping. He was then given ten days in which to leave the county. The mob then went to the home of James Stepleton, nearby. They informed him what they had done to Ford and gave him 30 days in which to leave the county. Stepleton and Ford have been in the county about a year and have been working in the timber for the C. V. Parker company. State's Attorney Thompson and other county officials have started an investigation.

Excellent progress in training disabled veterans of the World war is being made at the University of Illinois, according to a statement by Kendrick C. Babcock, university counselor for the veterans. Two hundred and twenty-three veterans who were disabled received vocational training at the university the past year under the guidance of the United States veterans' bureau. These men registered in all of the regular courses of the university, and special courses in agriculture were given solely for their benefit. Special funds are provided by the university for the use of vocational students. These are used when federal checks are delayed.

Lying in state at her late home in Kankakee, the body of Mrs. Lea Small, wife of the governor of Illinois, who died suddenly during a welcome home of the governor following his acquittal at Waukegan on charges of conspiracy, was viewed by thousands from all parts of the state, who attended the funeral. Special trains from Springfield and Chicago bore hundreds of friends of the governor and his family to Kankakee. Special cars took many more from nearby towns. Gotthard A. Dahlberg, speaker of the Illinois house of representatives, named all members of the house as a legislative committee to attend the funeral. Business houses in Kankakee, at the request of Mayor Radeke, closed during the services.

Ignatz Potz, convicted slayer of Motorcycle Policeman William Peterson of Winthrop Harbor, who was to have been hanged June 16, but was granted a 60-day reprieve by Gov. Len Small, was informed that the governor, upon request of Mrs. Small only a few hours before her death, had commuted his sentence to life imprisonment.

Twenty-five million baby salmon from the state hatchery at Spring Grove will be placed in the Fox river within a few weeks. Fox river lakes north of Aurora have been stocked with millions of trout.

Brig. Gen. Henry J. Kelly has forwarded his resignation as commander of the Fifty-eighth field artillery brigade, Illinois National Guard, to the adjutant general.

A special session of the state legislature to enact an industrial court law, in addition to creation of a state constabulary force, is urged by Representative Otis A. Arnold in a letter to Gov. Len Small.

Eight hundred new members were added to the Warren county farm bureau in the membership campaign recently ended. An additional number is expected this fall, when present memberships expire, bringing the total new membership for the year to the 3,000 mark.

For the first time in fifty years the council of deliberation, the governing body of the Masonic consistory, held its annual meeting in Freeport recently. This organization includes all thirty-third degree Masons of Illinois and the presiding officers of the consistories in this state.

Residents of the southwest portion of Bloomington, known as Stevensonville, have been assured of a long-sought system of water mains by recent action taken by the city council. Plans and estimates have been prepared and will be presented to the council for approval.

Quincy industries have not yet felt the pinch of the coal strike, nearly all of them having a 30-day supply of fuel on hand. Several of the larger ones as well as the public utilities are using hydro-electric power from the Keokuk dam. The gas company has a good supply of coal on hand.

Illinois' appropriation for federal aid roads in Illinois this year is \$2,164,187. The bill carrying the amount has been signed by President Harding and the money will be available soon. The state legislature at its last session appropriated a sufficient amount to match that to be received from the government and the total will be used in the construction of hard roads.

Twenty-one strip and wagon coal mines in the Danville district were closed by the miners' union officials of that subdistrict. The mines have been worked under permission of the board on the promise that no coal would be shipped. The Danville Water company, the Illinois Traction system and other utilities using coal from these mines will be handicapped through curtailment of their supply.

Sangamon county owes Lake county something over \$14,000 for the actual court expenses in connection with the trial of Governor Small, which ended with a verdict of "not guilty." The clerk in the office of the circuit court, co-operating with the county clerk, are now making up the bill, which will be presented at once to the Sangamon county board of supervisors, with a request for payment.

Prevention of crime was the principal subject discussed at the twenty-fifth annual convention of the Illinois Police association, in Granite City. Two hundred and fifty delegates of the association from many cities and towns in Illinois were in attendance. Capt. Homer Reed of Rockford was elected president and Decatur was selected as the place for next year's convention.

Announcement of the appointment of Prof. Milo S. Ketchum, head of the department of civil engineering at the University of Pennsylvania, as dean of the college of engineering at the University of Illinois was made by President David Kinley. Professor Ketchum succeeds Dean C. R. Richards, a member of the faculty since 1911 and who resigned to become president of Lehigh university. The dean-elect is a native of Illinois. He was born in Henry county.

Among the organizations which have made an active response to the need of assistance on the part of the sufferers from the Illinois river flood are the Knights of Pythias. Grand Chancellor S. Y. Whitlock on May 4 issued an appeal in behalf of the Pythian flood sufferers of Beardstown, and the response has been prompt and generous. Up to date around 200 lodges and individuals have been heard from, and it is hoped that the \$3,000 mark in contributions will be passed soon.

No additional bodies were recovered from the wrecked strip mine near Herrin by Coroner McCowan and a squad of deputies who excavated around the destroyed steam shovel of the Southern Illinois Coal company. It had been rumored that several bodies of slain miners were buried there in the recent tragedy. Other developments in the mine situation in Williamson county were an announcement by Circuit Judge Hartzell at Marion that a grand jury investigation of the mine massacre would begin July 10 and the first arrest in connection with the mine disorders in the district. Maintenance men at three mines of the Madison Coal company, near Carterville, who had quit work after being warned to leave, returned to their posts, and deputy sheriffs arrested a union miner at Carterville in connection with the threats.

Excepting Chicago, the membership of the Springfield Young Men's Christian association is the largest in the state, according to word received from the Y. M. C. A. at Aurora, which has claimed the distinction for several years. The present membership of the Springfield association is within less than fifty members of the 2,000 mark, while Aurora's total membership amounts to 1,767, giving Springfield a lead of approximately 200.

Salaries of all Ogle county officials who have been receiving \$2,500 or more have been cut to \$2,000 per year by the county board.

Had Your Iron Today?

Toast It—Delicious Raisin Bread.

Do this some morning and surprise the family: Serve hot *raisin toast* at breakfast, made from full-fruited, luscious raisin bread. Let your husband try it with his coffee. Hear what he says.

Your grocer or bake shop can supply the proper bread. No need to bake at home.

Made with big, plump, tender, seeded Sun-Maid Raisins, and if you get the right kind there's a generous supply of these delicious fruit-meats in it.

Insist on this full-fruited bread and you'll have luscious toast.

Rich in energizing nutriment and iron—great food for business men.

Make most attractive bread pudding with left-over slices. There's real economy in bread like this.

Try tomorrow morning. A real surprise. Telephone your dealer to send a loaf today.

Sun-Maid Seeded Raisins

Make delicious bread, pies, puddings, cakes, etc. Ask your grocer for them. Send for free book of tested recipes.

Sun-Maid Raisin Growers, Membership 13,000, Dept. N-16-12, Fresno, Calif.

SAW OPPORTUNITY TO SAVE

If Tale Is True, Peking Merchant Was More Than Ordinary "Child-like and Bland."

Dr. Wellington Koo, the brilliant young Chinese diplomat, said at a dinner party in New York:

"Some men seem to think that we Chinese are a very childlike and very innocent people. They think we all exactly resemble the Peking merchant of the story.

"According to this story—and it is a gem—a Peking merchant took a rather notorious foreigner to board with him at a rate of \$20 a week. Six months passed, and the rather notorious foreigner had not yet let his host once see the color of his money. "So, at the end of the six months, the Peking merchant thought the matter over very thoughtfully and reduced the foreigner's board from \$20 to \$10. He explained that thus, if the foreigner never paid him, he would not lose so much money."

Marble Paper Printed. A machine has been invented which will print marble paper, heretofore made only by hand and at considerable expense.

It is needlessly expensive to make the same error twice.

Conscientious.

At one o'clock in the morning the conscientious Smith college freshman tiptoed downstairs and knocked loudly on the housemother's door. Grabbing kimono and slippers in great haste the housemother ran to the door to see what all the excitement was about. A loud knock at 1 a. m. surely meant nothing less than a fire. "Oh, Mrs. Henry," said the conscientious freshman excitedly, "I sneezed a couple of times and think I must be getting a cold. You know Doctor Gilman said in hygiene lecture that the minute we felt a cold coming on we must tell the housemother about it!"

Elaborate Responsibility.

"It's a busy life," remarked the man who was waving a palm leaf fan.

"How have you been occupying yourself?"

"Voting. It's everybody's duty to vote. In addition to voting for state, county and town officers, I voted in the primaries, got elected as a delegate and voted over and over in the convention. Of course, I'm going to vote in the fall election, and I only hope they'll let me round out my record by putting me in the electoral college."—Detroit News.

Have You Read Yours?

"Is your house insured against fire?" "I don't know. I've just been reading over the insurance policy."

You will find in Postum

a delightful and satisfying mealtime beverage, with no element which can harm nerves and digestion—or cause wakeful nights and dull days.

Your grocer has Postum in two forms: Instant Postum (in tins) made instantly in the cup by the addition of boiling water. Postum Cereal (in packages of larger bulk, for those who prefer to make the drink while the meal is being prepared) made by boiling for fully 20 minutes.

Made by Postum Cereal Co., Inc., Battle Creek, Mich.

Work in His Lot.

The eight-hour working day is unknown in the rural districts of the Balkans. The peasant works from sunrise until after dark. He is so bent and weather-scarred that he looks twice his age after thirty. In some cases he belongs to nomadic tribes and leads an existence unknown in the country district of England or America. At night one often passes whole wagon loads of them on the road going from town to town. Every man is asleep on the top of his load and is not disturbed by thoughts of burglars or highwaymen.

Do You Know That—

A strong earthquake is sometimes, though not always, preceded by a few slight shocks, and it is invariably followed by numerous shocks of this character. The aftershocks sometimes continue for years. More than 3,000 aftershocks were registered by seismographs during the two years following the great Mino-Owari earthquake in Japan, which occurred Oct. 28, 1891.

Diet of Dates.

In days gone by many families in Upper Egypt subsisted principally on dates. The stones or kernels were ground on hand-mills and given to the camels. Within recent years the animals have had to crunch the stones.

Tact in Questioning.

He that questioneth much, learneth much, and content maketh; but especially if he apply his questions to the skill of the persons whom he addresseth; for he shall give them occasion to please themselves in speaking, and himself shall continually gather knowledge; but let his questions not be troublesome, for that is fit for a pester; and let him be sure to leave other men turns to speak.—Bacon.

Curfew Law Needed In Mokena

A very disgraceful affair took place Wednesday night, when a crowd of young kids, who thought it a wise stunt to "smoke out" John Wannemacher, Mokena saloon keeper, shot off a lot of fireworks in front of his saloon, then set a rag afire and threw it on the porch. Not content with this, they threw firecrackers in the saloon and set Mrs. Wannemacher's clothes afire. She also was slightly burned in the face by the exploding fireworks. Both Mr. and Mrs. Wannemacher were alone when the affair happened.

The youngsters stayed on the streets until after 11 o'clock shooting fireworks. The parents evidently do not care where their kids roam, and the hour of the night makes no difference to them. Some of the citizens feel that the city fathers are rather lax in allowing such things to go on. It is suggested that the curfew law should be enforced, and if the parents do not keep their children off the streets at night, then the village authorities should.

Of course, the youngsters do not know enough to realize in what danger they were setting the Wannemacher home. It might have caught fire, and much serious damage could have resulted.

You Guard Against Burglars, But What About Rats?

Rats steal millions of dollars' worth of grain, chickens, eggs, etc. Destroy property and are a menace to health. If you are troubled with rats, try RAT-SNAP. It will surely kill them—prevent odors. Cats or dogs won't touch it. Comes in cakes. Three sizes, 35c, 65c, \$1.25. Sold and guaranteed by Mokena Hardware Co., D. Kolber, Mokena.

All Patriot Had to Give.

The flag which accompanied Garibaldi in all his expeditions, has been discovered in the chapel of the Villa Arson of Nice, which belongs to Count Raymond de Castellane. It is stated that Garibaldi stood godfather to the little daughter of his friend, Comendatore Arson de Saint-Joseph, and appeared at the baptism with his flag, which he presented with the words, "This is all a soldier can give." Count Raymond presented the flag to the Massena museum.

A Hint.

When a man asks for your opinion, look wise and keep quiet. He is only looking for an argument.—Richmond Times-Dispatch.

Great Chicago-Cook County Fair Will Be Held At Checkerboard Flying Field, Maywood, Illinois, August 26 to September 4.

Officials of the Great Chicago-Cook County Fair announce that their all Cook County Agricultural Fair will be held at Checkerboard Flying Field, adjoining the famous Speedway at Maywood, Illinois, August 26th to September 4th.

The grounds are located at the intersection of Roosevelt Road and the beautiful Des Plaines river, and is easily reached by automobile, by the Chicago surface line, the Aurora and Elgin Interurban, the Chicago and Northwestern, the Forest Park Elevated and the Great Western, while the Illinois Central runs into the grounds. The location is only ten miles from Chicago's loop.

These grounds have been chosen because the officials of the Fair feel that they meet the transportation requirements of all parts of the county, including the great City of Chicago, have the requisite number of acres and meet topographical requirements, and are already more or less familiar to the general public.

"We are spending thousands of dollars this year to make the Great Chicago-Cook County Fair a truly educational-agricultural exposition, believing that such an institution can serve a great purpose in bringing the city and country people to a better understanding of their problems," said Glenn G. Hayes, General Manager, when interviewed by this paper.

A Merchant

We know says that it's his job to please his customers. He is 100 per cent right. It's our job to please merchants by providing the kind of printing that is wanted. Try us and see what we can do.

We Make Good

Fordson THE UNIVERSAL TRACTOR

This Astounding Low Price is the final answer to the high cost of farming problems.

With a Fordson one man can do more work easier, and at less expense than two men can do with horses.

With a Fordson you can actually raise more crops with less work, lower costs and fewer hours of work.

With a Fordson you can save money, time and drudgery on every power job on the farm—the whole year around.

Let us give you the proofs of the great savings made by the Fordson. Call, write or phone today.

Orland Garage Orland, Ills.

Uncle Eben's Philosophy.

"When I works," said Uncle Eben, "I gits along better wifout a helper, unless I kin find enough fob him to do to keep him 'um thinkin' he's a audience."

And Save All Risks.

There is no excuse for murder nowadays. By waiting awhile, you may live to read that your enemy killed himself with his motorcar.—Kansas City Star.
